## DETAILED ACTION

### *Election/Restrictions*

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 2 to 7, 18 to 21, and 27, drawn to a compressor control responsive to specific sensor inputs, classified in class 417, subclass 18.
- II. Claims 8 to 12, 16, 33 and 34, drawn to a compressor control having a status indicator, classified in class 417, subclass 63.
- III. Claims 13 to 15 and 25, drawn to a compressor control including liquid injection, classified in class 62, subclass 190.
- IV. Claims 35 and 36, drawn to a compressor control wherein the control module is mounted on a chassis, classified in class 417, subclass 44.1.

The inventions are distinct, each from the other because of the following reasons:

Inventions I to IV are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility because it does not require a status indicator, liquid injection or a control module mounted on a chassis. Each of the other inventions likewise does not require the features of any of the remaining inventions. See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Art Unit: 3746

Claims 1, 17, 22 to 24, 26 and 28 to 32 link the inventions and will be examined with the claims of the elected invention.

A telephonic election was not attempted in view of the complexity of the restriction requirement and the subject matter of the inventions.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
